Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukawa (US Patent 5568654).

As for claim 1, Fukawa teaches a wireless communication terminal comprising: selecting means for selecting a base station with which to communicate; detecting means for detecting a radio wave reception level of the base station selected by said selecting means; determining means for determining whether said base station selected by said selecting means is delivering predetermined data; switchover controlling means which, if the detected radio wave reception level from said detecting means drops below a predetermined level, then causes said selecting means to switch to other base stations consecutively for communication while checking each base station selected for the radio wave reception level thereof and for availability of said predetermined data to be delivered therefrom; and selection controlling means which, if the detected radio wave reception level from said detecting means drops below said predetermined level during reception of said predetermined data, then causes said selecting means preferentially to select a base station which is delivering said predetermined data and

which offers a radio wave reception level higher than said predetermined level, based on the radio wave reception level of each base station selected and on the availability of said predetermined data to be delivered therefrom (Abstract; Col. 1, lines 26-49; Col. 2, line 52-Col. 3, line 12; Col. 12, lines 47-65; and Col. 13, lines 35-64).

As for claim 2, Fukawa teaches a wireless communication terminal, wherein said predetermined data includes at least any of video and audio data and other mass data being delivered continuously via said base stations (Col. 5, lines 62-66; Col. 6, lines 25-30 & 55-63; and Col. 6, line 67-Col. 7, line 6).

Regarding claim 3, see explanation as set forth regarding claim 1 (device claim) because the claimed method for planning a wireless communication terminal would perform the device steps.

Regarding claim 4, see explanation as set forth regarding claim 2 (device claim) because the claimed method for planning a wireless communication terminal perform the device steps.

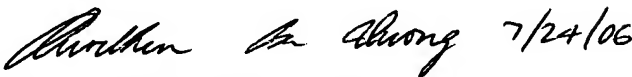

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janelle N. Young whose telephone number is (571) 272-2836. The examiner can normally be reached on Monday through Friday: 8:30 am through 4:00 pm.
